VOL. XXX, No. 1

DIDSBURY, ALBERTA, THURSDAY, APRIL 6, 1933

\$2.00 per Year. 5 cents a copy

## Clean Up Week April 10th to 15th

The town council has declared the week April 10th to 15th as clean up week.

With the approach of spring it behooves the citizens of this town to clear away the accumulation of trash which has gathered during the winter months and get their premises in shape for the summer. A little effort on the part of the householder in raking up the front yard in conjunction with cleaning up the back premises will go a long way towards improving the appearance of the town.

Didsbury has always had the reputation of being a clean town and we hope that the provincial sanitary inspector, who will make his annual visit during the next few weeks, will be able to make his usual good report.

## Tennis Club Organizes.

The tennis club held its organization meeting Tuesday evening at C. E. Reiber's office.

Mr. L. Fry was elected president; Mr. Tom Reynolds, vice-president; Mr. Art Reiber, secretary-treasurer; Messrs. Len Berscht, Fred Evans, Albert Weston and Jack Currie, grounds committee.

Arrangements were made to put the courts in good playing condition and it is expected to enrol a large membership.

Fees were set at: Gents \$3.00; Ladies \$2.00; Students \$1.00.

## Wheat Shipments Break Record

Although there are still 4 months before the close of this grain shipping season, a record amount of wheat has been marketed in Didsbury.

Slightly over one million bushels of wheat have been marketed here this season, and almost a quarter of a million bushels of coarse grains.

The previous high mark was reached in 1923, when 1,250,000 bushels of grain were shipped out of Didsbury and almost half of this was coarse grain.

It is estimated that there are about 150,000 bushels of wheat and 200,000 bushels of coarse grain still in the hands of the farmers.

## Hospital Report.

The following statistics appear in the annual report of the Didsbury General Hospital:

Patients from M. D. No. 310	70
Patients from M. D. No. 311	63
Patients from Didsbury	57
Patients from elsewhere	100
<b>Total</b>	<b>290</b>
No. of Medical Cases	78
Major Surgical Cases	39
Minor Surgical Cases	38
Obstetrical Cases	68
Babies Born	67

## MARRIED:

At the United Church Manse on Thursday March 30th, 1933, Thomas Taylor and Hazel Marie Farrell, both of Carstairs.

## LOCAL & GENERAL

Rev. A. J. Mitchell was a visitor to Calgary on Monday.

Mrs. J. H. Lowrie visited the southern city Tuesday.

Mrs. Lewis, of Calgary, is visiting at the home of Mrs. Charlie Cummings this week.

Mrs. E. G. Ranton, who has been visiting her sister at Edmonton, returned home Wednesday.

Miss M. Saugstad, who has been receiving medical treatment in Calgary, returned home Sunday.

Mr. W. H. Davies and Mr. Arthur Jackson each shipped carloads of cattle on Tuesday.

We are pleased to report that Mrs. Roger Barrett, who has been in hospital at Calgary for the past ten days, is progressing favorably.

A grand dance will be given in the Didsbury Opera House Easter Monday April 17th. Music by Dodd's Orchestra. This orchestra is rapidly growing in popularity.

Zane Grey's "Mysterious Rider," with Kent Power. A high-class Western at the Opera House on Monday and Thursday April 10th and 13th.

The W.C.T.U. will hold an Easter sale in the Candler Block, Saturday April 14th, consisting of home cooking and Easter novelties. Luncheon will be served from 12 to 3 p.m.

Piano Tuning De Luxe! Gavin Spence and W. H. Norton will be in Didsbury next week for their 22nd annual visit. Don't hope for the best—get it! Leave orders at the Pioneer Office.

The U. F. A. will give a handkerchief social, Lone Pine Hall on Friday April 7th. The ladies will bring handkerchiefs and lunch baskets. Handkerchiefs will be auctioned to the highest bidder.

Vote every sneeze! Jimmy Durante says so, for he has a million laughs for you in "Phantom President" at the Opera House tonight (Thursday). With Geo. M. Cohen and Claudette Colbert.

The drawing at Berscht's store Saturday attracted a huge crowd. The winners were: 1st D. G. Hardbottle; 2nd Henry Klein; 3rd Raymond Bellamy; 4th Marjorie Thede.

Dr. Clarke had the misfortune to have his face badly cut on Tuesday when driving to Calgary. A truck threw a piece of rock through the windshield of his car, the flying glass cutting his face.

Miss Ethel Ewing, accompanied by Mr. Jim Morris, drove to Lacoube on Saturday and spent the week-end with her parents. Jim had to make sure on several occasions that he had no flat tires, it being April 1st.

## Fish & Game Asso. Elects Officers

The local nimrods turned out strong for the annual meeting of the Fish & Game Association held on Monday evening. Mr. Geo. Julien was in the chair.

The objects and work of the Association were discussed. It was pointed out that the local branch had interested itself in the propagation of game-birds, having introduced Mongolian and Chinese pheasants into the district, as well as being instrumental in having changes made in the game laws, which were in the interests of the preservation of game. During the past year the association had been successful in helping to check the establishment of private fences for hunting and fishing purposes.

The recommendation for the appointment of a fish-warden in the district west of town came in for considerable discussion and it was finally decided to leave the recommendation in the hands of the executive committee.

It was decided to again set the membership fee at the nominal sum of one cent.

The following officers were elected: Hon. President, Mr. R. T. Rold; Mr. W. Clarke, Mr. Cms. Hayden; President, Mr. J. A. McQueen; Vice-President, Mr. C. E. Reiber; Secretary, Mr. J. E. Geeler.

Executive Committee: Messrs. W. A. McFarquhar, A. C. Fisher, Geo. Julien, Hugh Lee, A. Brusco. Membership Committee: Messrs. W. A. McFarquhar, J. W. Ballon, Carlton Leeson.

Big Game Committee: Messrs. A. C. Fisher, R. Jackson, C. Ashhead. Game-Bird Committee: Messrs. Geo. Julien, Leeson, J. H. Fleury.

Fish Committee: Messrs. Hugh Lee, C. E. Reiber, Ward Keith. Committee for the Destruction of Pests: Messrs. A. Brusco, W. E. Culling, W. A. McFarquhar.

## Town Council.

The regular meeting of the town council was held Monday evening at the High School, with Mayor H. W. Chambers in the chair. All the councillors were present.

The council, together with a few power users, conferred with Mr. James and Mr. W. Ross, of the Calgary Power Co. in respect to charges for electric power. Mr. James pointed out that the charges for power in Didsbury were in line with all other towns of similar size in the province. He also stated that the service charge to commercial and domestic users was the lowest obtainable in the province. Several other questions regarding electric service were discussed.

The financial statement and report of the hospital board was presented and left over to the next meeting for further discussion.

The town secretary reported on the assessment for 1933. Last year's assessment of land and buildings was adopted, with the exception of C. P. R. lands, which were occupied by elevators, co-ops, etc., which will now be assessed to the owners of the land. A new assessment for business tax purposes was made with a downward revision in rental valuations.

The mayor pointed out that with the approach of spring it was necessary to make a general cleanup, and it was decided to set next week, April 10 to 15 as Cleanup Week, and also asks the townspeople to co-operate by cleaning up their premises.

## Good Friday.

Friday next week, Apr. 14 being Good Friday, all business places will be closed. Stores will be open next Wednesday afternoon and also Thursday evening.

## MAC'S SERVICE HARDWARE

## High Commissioner's Office In London Sends a Warning Note About Cattle Export Trade

Too much importance cannot be placed upon the suggestions made in the following paragraphs from a report issued on a thorough investigation by the High Commissioner's office of the situation in respect to our export cattle trade. A note of warning which we cannot afford to ignore is quite apparent in these paragraphs, which should be placed before every person interested in avoiding any action which might tend to jeopardize the development of our export cattle trade in Great Britain.

"It is now generally recognized that there has been an improved selection of steers for the export trade in recent years, and their popularity here has spread accordingly. Dealers and buyers are peculiarly sensitive to disappointment when the standard of excellence drops in any one shipment. The burden of returning a reasonably good price for common sorts of livestock imposes a difficult task on salesmanship, and designers appreciate the adverse effect on business of unfavourable price returns. Constantly they are telling the shippers what the trade wants and urging them, diplomatically, to choose export cattle carefully for type, weight, age and conformation. But the she-cattle trade, being rather more diversified, breeds itself more readily to increasing experiences than does the trade in steers.

"Our healthy heifers and cows have been talked of and written about frequently. There has been created an atmosphere of hopeful expectancy. The value of goodwilt is an additional consideration. Its place in the respective sections of the British trade ranks high, and this fact should be weighed carefully by the Canadian shippers.

"It is not possible to forecast whether or not cows and heifers, suitable for breeding and dairy purposes, can be selected and shipped to advantage. That will be determined only by trial and experience. Slavering the trade demand for suitable stock is the more preferable and prudent policy; over-feeding it with common sorts, especially of the latter, will stunt, and may even damage, a promising potential trade.

"She-stock selected in Canada for breeding or dairy purposes in Great Britain, and lacking the characteristics fitting to the ideas and needs of the people specializing in these particular activities, will not succeed, except at uneconomic prices. Experience of this sort will give, in addition to uneconomic prices, a wrong impression in Great Britain of the value and usefulness of our she-stock, a condition that will cost the producers and shippers considerable money, and one that will be difficult to correct. The same thing applies to our steers going into new areas.

"Such a result, if it were possible to forecast, should not be risked or permitted. Even extreme precautions to safeguard the new trade, and the new opportunity, could be justified. Furthermore, I advise the trade here if they would not support concentrated action, at the outset, to attain this desirable objective.

"For the general guidance of shippers who are considering the possibilities of serving the dairy industry with either heifers or springer cows, refreshing three or four weeks after landing, the great majority of the dairy farmers prefer a good size animal, which, of course, should possess milking qualities and conformation. The heifers most favored are cross shorthorns or crosses out of Holstein and Ayrshire by a Shorthorn bull. Pure bred Ayrshires or Holsteins are not favoured unless they are of the top class. The dairy shorthorn type and size is what dairymen have in mind.

"One dealer suggests that: Shippers should give the fullest information as to probable dates of calving; what kind of sire produces the calf; and what age the cow is whether first, second or third calf. We would recommend cows about four to five years old, carrying second or third

calf. First calf cows would not sell as well, owing to the prospect of smaller milk volume during first calf period.

"The first choice in Scotland, for heifers for best breeding purposes is well bred Angus or Friesian females. Shorthorns are second. Herefords are not popular in England. The Friesian bull takes a better place.

"Realizing and sustaining profitable results in building up cattle business will depend very largely upon the direction and conduct of the initial efforts in the new field of markets.

"Common sense should convince us that the points made in the above paragraphs are well taken, and that all concerned would do well to exercise every reasonable precaution in respect to volume and quality of cattle exported to the United Kingdom. If, however, further proof is necessary, nothing could be more appropriate than the following statement from a letter dated February 17th from the Animal Products Trade Commissioner in London to the Dominion Live Stock Branch, Ottawa, in respect to a recent shipment sold at Birkenhead.

"The cows, whether or not they were intended for slaughter or milking, were unsuitable for either purpose. None of the buyers was interested to the extent of tendering a bid. Usually what happens with the sale of such animals is that they are left with the consignee until he commences to feed the costs to the shipper for holding the cattle are accumulating out of proportion to the chances of getting a satisfactory price; consequently, in his interests, the sale is concluded mostly at the buyer's figure, and for the very good reason that, although they are unsuitable for the meat trade there is, nevertheless, no alternative outlet."

"Adding conviction to conviction, we can do nothing better, in concluding this statement, than quote from a letter received from one who has, for more than a quarter of a century, been active in the United Kingdom market.

"You may advise any inquirers that rough cattle are not wanted, and it would be very foolish to put the cost of shipping on common cattle. It costs just as much to ship and sell a bad one as a good one. England wants only well bred cattle in good condition."

"Soap should never be used on white silk. It should be dissolved in water before laundering is begun.

## Lack Of Phosphorus Causes Tooth Decay

According To Results Of Experiments By Dr. Agnew

Tooth decay is primarily due to lack of phosphorus and Vitamin "D" in the diet, according to the results of research made by Dr. R. Gordon Agnew of the West China Union University. Working with hundreds of laboratory animals, Dr. Agnew was able to produce tooth decay in practically all the cases by depriving them of these two food elements.

Eating sugar, candy and other sweets, it was further indicated by these test diets, has not effect in itself in causing tooth decay, except that by satisfying the appetite for quickly it tends to keep down the intake of the foods which contain the elements which do make for sound tooth structure.

Dr. Agnew says that among the Tibetan tribes in particular, where tooth decay is especially infrequent, while their diet is highly restricted, the eating of whole corn, an important article of their daily food, supplies them with adequate phosphorus while their diet of deer life in the sunshine assures them of plenty of Vitamin "D."

## Value Of Life Insurance

Interesting Statement Made By Hon. Charles A. Dunning

Hon. Charles A. Dunning, former Canadian finance minister, made an interesting statement with respect to life insurance in his annual address as president of the Ontario Equitable Life when he said: "Life insurance as an institution is at once the greatest debt and the greatest creditor in Canada; the greatest Canadian debtor because its contracts to pay are larger in volume than any other in our national structure; the greatest Canadian creditor because it has accumulated in small amounts with respect to the five million lives insured over two and one-quarter billion dollars, which it has loaned to governments, municipalities, school districts, railways, utilities, industries, its own policyholders, and also on mortgage." Toronto Star Weekly.

## Good Stories Being Spilled

Now it is the story of Dick Whittington that is being mingled by the "Debutantes." It appears Dick did not own a wonderful cat; that he was quite well off, was not obliged to leave home, and that consequently he never heard the call to turn back and be Lord Mayor of London. If this sorry business continues, none of the picturesque figures of an earlier day will be left. Toronto Globe.

Americans purchase \$30,000,000 worth of fraudulent stocks each week.

## Northwest Company Operates Furthest North Petroleum Well In The Great Bear Lake District

### Learning To Fly

Mexican Tree Frog Can Drop Slowly From Great Heights

A Mexican tree frog that appears to be learning to fly is described by Dr. Remington Kellogg, of the United States National Museum. This frog, he says, has elongated hind legs well adapted to jumping, and has been known to leap and alight without injury a height of 140 feet. Dr. Kellogg has conducted a number of experiments to test its powers of flight. When he dropped one from a high water tower he said it immediately spread out its limbs and sailed down slowly at an angle, landing uninjured about ninety feet away from the base of the tower. There appeared to be no further acceleration after the frog had fallen about twelve feet, he said. At other times, Dr. Kellogg has tried throwing these frogs into the air. Each time he did so, he said, they always managed by violent struggling to get into a balanced position and glide to the ground unharmed.

Sometimes what seems a prosaic business transaction has behind it a world of romance and high adventure. Such was the case when the Department of the Interior, early in 1923, received from the Northwest Company, Limited, a subsidiary of Imperial Oil Limited, a cheque for the amount of the first royalty payable to the Government on the production of the Company's petroleum well near Norman in the Northwest Territories, nine hundred odd miles, as the Canadian map shows, north of Edmonton. That slip of paper contained only ten or a dozen words, but how much of faith vindicated and work accomplished it revealed.

In 1921 the Northwest Company struck a flow of petroleum, reputed to be the best to be struck at the rate of 100 barrels per day, in what is commonly called the Norman well, situated on the bank of the Mackenzie fifty-three miles below Norman. The well was completed in 1923 and as there was no immediate local use for the oil it was capped to prevent waste.

When it became clear that there was oil in commercial quantities half way down the Mackenzie between Great Slave Lake and the Arctic Ocean there was a lot of popular speculation as to what would be done about it. Common sense, however, was that the oil was useless where it was and would never become a commercial proposition. It was held that it would be out of the market until the southern wells went dry and even then the cost of freighting it up eleven nine hundred miles or one thousand miles to rail head, or pumping it up hill through a pipe line for the same distance, would be prohibitive.

Then came the aeroplane, and maps made from aerial photographs. Prospects and the supplies were taken in from rail head in as many hours as it formerly took weeks, and were moved from location to location with equal speed. Steamboats and tractors, canoes and dogtrains were in use, too, but it was the aeroplane which carried the master key to the doors of the North.

The mineral deposits about the east end of Great Bear Lake were discovered, development began, and there was a demand for gasoline and fuel oil. Great Bear Lake empties into the Mackenzie River through Great Bear River, at the mouth of which latter Norman is situated. The Norman oil source in 1932 was, therefore, comparatively speaking, next door to its customers, with water transportation except one portage around a stretch of rapids in the Great Bear River from the well to the east end of Great Bear Lake. The Northwest Company, which had brought in a small refining plant in 1921, opened this up in the spring of 1932 and supplied gasoline and fuel oil for running motors and Diesel engines in the mining camps. It was upon this production that the royalty was paid, and while the output so far has been relatively small this commercial use of northern oil is both a fulfillment of well grounded predictions of ten years ago and a promise of greater things to come.

## Newshoys Are Quick

Can Tell Nationality Of Customers By Their Shoes

Americans occasionally when travelling in England like to be taken for Englishmen. One of the best ways of doing this is by wearing a pair of English-made shoes. A man in London, where he got himself a complete English outfit—suit, hat, linen, gloves, overcoat and cane.

Dressed in the outfit, he walked out to the steps of his hotel and stood there a moment contemplating the weather. Just then a newshoy almost a block away, came dashing toward him crying:

"New York Herald here y'are sir!"

It was a vendor of foreign newspapers in Paris who told the secret of his little game, saying that the nationality of prospective customers "I look at their shoes," said he.

By Ruth Rogers

A WELL BEHOWN APRON TYPE

Simple and comfy to slip into. It's the simple type that needs no introduction. It hugs the figure, being pinned at the front to create a slender line. It also has deep inset pockets either side of the front, so essential to the busy housewife.

You'll note it has deep open armholes. And this for two good reasons. One is that comfort will be a desirable quality. Another is that it will not catch the sleeves of the frock. You can make it at a big saving in cost. You can almost run it up before breakfast on the sewing machine. It's so easily put together.

Style No. 821 is designed for sizes 36, 40, 42, 44 and 46 inches bust.

Size 36 requires 2 yards of 39-inch material.

Price of pattern 20 cents in stamps or coin (cash is preferred). Wrap cloth carefully.

### Mr. A. Speakman, M.P. on Wheat Preference.

Mr. J. L. Chandler, who has had some correspondence with Mr. A. Speakman, M.P., has received the following letter, which he handed to us for publication.

House of Commons,  
Canada,  
March 25th 1933.

Dear Sir:—

I am in receipt of your letter of recent date, in which you make reference to the 6-cent preference granted to Canadian wheat in the British market, under the provisions of the Trade Agreement entered into between this country and Great Britain at the late Imperial Conference. In this letter you speak of the preference as a "bonus," and ask of what value it is to the Canadian farmer, and further expressing your opinion that the British delegates "put one over" on our own representatives in respect of this Agreement.

In answering your enquiry, I am, of course, giving my own interpretation of these provisions, as there has been much difference of opinion on this matter, and many conflicting statements have been made as to the benefits or otherwise, which may accrue to this country as a result of this Trade Agreement, many exaggerated statements having been made upon both sides of the argument, leaving a great many people in a state of bewilderment as to the actual facts.

As I see it, this 6-cent preference, for it is not a bonus paid upon our wheat, but simply a 6-cent duty levied by Great Britain upon all Non-Empire wheat entering her markets, cannot, and was not intended to increase the price which we receive. The only advantage which I can see, so far as our wheat is concerned, lies in the fact that we are assured of a larger share of the British market than would otherwise be the case. This is a real advantage, although not a very great one. At the present time more wheat is produced and offered for sale by the wheat-exporting countries than the wheat-importing countries can accept, under present conditions. This means that there must be a carryover at the end of each year, and by placing Non-Empire wheat under this disadvantage, our share of this carryover will be smaller than it would have been had not this Agreement been made. The importance of this assured market, even at world prices, is enhanced by the fact that a number of the European countries, formerly importers of Canadian wheat, have now practically closed their doors. While I see this slight advantage which is ours, by reason of the 6-cent preference on wheat, I have never attached the importance to this provision that some have done.

In my opinion the terms of the Agreement are of much more value to the livestock and dairy farmer than to the purely wheat farmer, and may result in a better and more profitable market for our ham and bacon, our dairy products and our live cattle. Take the case of bacon: During the last year the British hog

producer has been in a very bad position. A flood of imported bacon, far beyond the requirements of the British market, had been pouring in, with the result that prices had fallen to a level where the British farmer was being forced out of business. The British government appointed a commission to investigate the situation and to suggest such policies as might raise bacon prices to a level where the British producer could sell at a profit. This being done, and under the terms of the Trade Agreement, our hog producers are to have the right to sell their products in the British market at the same prices and under the same conditions as the domestic producer. Surely, a price which is profitable for the British farmer, with his higher operation costs, should be fairly profitable for the Canadian producer. We are allowed to sell up to 280,000,000-lbs. per annum under these conditions, or many times more than we have ever exported to Great Britain.

Somewhat similar action has been taken in respect to dairy products, while, in the case of our live beef cattle, all restrictions against their entry have now been removed. I believe that the terms of the Agreement should be beneficial to the Canadian producer of beef cattle, dairy products, ham and bacon, and for that reason I was one of those who supported the Treaty, but I have always felt that the possible advantage to our wheat farmers was relatively slight and was confined, as already stated, to the opportunity of selling a greater percentage of our wheat, although at a price which was no higher. Indirectly it is possible that the wheat farmer may be assisted. In the event of an improvement in the price level of the different meat and dairy products, so that those branches of agriculture were relatively more profitable than wheat, it might result in an increase of mixed farming, and a corresponding decrease in wheat acreage, which in turn might have an effect upon our wheat surplus and upon wheat prices, but this is problematic.

So far as the British exporter having received undue advantage is concerned, I cannot quite agree that this is the case. On the contrary I am of the opinion that greater concessions might have well been made in that respect. After all, our own people would benefit by the opportunity of buying British goods at a somewhat lower price level, and one of the criticisms made against the Treaty was that the duties against British goods were left too high.

While I do believe that the eventual result of the Trade Agreement should be beneficial to a part, at least, of our farmers, these benefits can hardly be obtained so long as the rate of exchange remains as it is, and has made it still more important that our Canadian dollar should be placed upon a parity with the British pound, or even better, upon a parity with the Australian currency. This, however, is another question, and one which I shall not discuss at the present time.

Trusting that the above is the information which you sought and that it may assist you in the study of these matters.

I am,  
Yours faithfully,  
Alfred Speakman.

## Electric Soil Heaters

— for —

## Frames and Greenhouse Benches

## Automatic Heat Control Has Many Advantages For Amateur and Professional Gardeners

- Gives hot frames the flexible temperature control now exclusively held by hot houses.
- Soil Heater supplies heat only when necessary. Manure is uncontrolled.
- With ordinary care and properly banked, framed Soil Heated hot frames can be used in mid-winter, although their greater use is in early spring and fall work.
- Even when heat is not required for forcing growth, the Soil Heater Thermostat can be set as a guardian against unexpected frost.

- Four square yards of Soil Heated hot frame in the middle of winter maintains 60 degrees minimum temperature for two months on approximately 216 kilowatt hours.
- The flexible temperature control of the Soil Heater permits controlled plant growth, hardening off when desired, and advantage being taken of favorable market conditions.
- Existing hot frames or benches may be used without extensive rebuilding and the same set-up can be used year after year.

Our Local Managers will be glad to give you further particulars regarding economical cost and proven results of Soil Heating by Electricity.

**Fulkerth Horses  
Win at Calgary**

W. J. Fulkerth was successful in winning a 2nd prize with a yearling Clydesdale stallion, and also won the reserve championship with the same horse at the Calgary horse show last week.

In the five-gaited class he took 1st, 2nd and 3rd prizes and on Friday afternoon gave a riding exhibition with his stallion, "The Dare."

At the jumps he took one 1st and two 2nd's with his pony, "Peggy."

**More Aid For  
Tax Debtors**

Giving further relief to Alberta debtors by spreading the payment of tax arrears over a period of six years, another important bill has just been distributed to members of the legislature.

This new measure is entitled to a bill to provide for the consolidation and payment of all instalments of certain local taxes. The act applies to all municipal and improvement districts; also it can be made applicable to such cities, towns and villages which by resolution passed not later than July 15th 1933, declare the act to apply.

The government has introduced the bill in accordance with the arrangement made at the Winnipeg Inter-Provincial conference early in the year. At that time the understanding was that uniform legislation concerning tax arrears consolidation would be brought into effect in the prairie provinces.

The bill provides that when a tax payer is in arrears for more than one year in respect of land taxes due to the municipality, or for school taxes, he may enter into a consolidation agreement whereby the arrears would be paid by instalments over a period of six years.

The scale of instalments is to be as follows:

1933, 10 per cent. 1934, 10 per cent.

1935, 15 per cent. 1936, 20 per cent.

1937, 20 per cent. 1938, 25 per cent.

Instalment must be paid on or before December 15th each year, and current taxes also must be paid on or before that date.

**Educational Society  
Meets at Edmonton,  
April 18th, 19th, 20th**

The annual meeting of the Alberta Educational Association will be held this year at Edmonton on April 18, 19 and 20.

As the depression continues, the program this year makes a departure from the academic educational topics to the purely social aspects of education.

E. J. Garland, M.P., Bow Island and Ira Dilworth, M.A., Victoria, B.C., past-presidents of the Canadian Teachers' Federation, will be the guest-speakers.

**WEEKLY JOKE**

The following letter was received by a teacher in a city school from a complaining parent:

"Sir,

Will you please for the future give my boy some easier somes to do at nites. This is what he brought home to me three nites ago: If four gallons of milk fill thirty pint bottles, how many pint and half bottles will nine gallons fill? Well, we tried and could make nothing out of it all, and my boy cries and said he wouldn't go back to school without doing it. So, I had to go and buy a nine gallon can of milk, which I could ill afford to do, and then we went and borrowed a lot of wine and brandy bottles, besides a few we had by us. Well, we enticed the can into the bottles and there was nineteen, and my boy put that down for an answer. I don't know if it is rite or not as we split some in doin it.

P.S. Please let the next one be water as I am not abel to buy any more milk."

30-Sheet Pads Examination Paper 10 cents each.—Pioneer Office.

**Obituary.**

W. J. HUNTER.

William James Hunter, son of the late Mr. Thomas and Mrs. Emily Hunter, died at the Didsbury Hospital on Monday, following an operation for appendicitis.

Deceased, who was 25 years of age, was born east of Didsbury and had since resided there.

There remain to mourn his loss, his mother; one sister, Jenn; four brothers, John, of Sulvan Lake; Joseph, Theodore and Lawrence, of Didsbury; a sister-in-law, Mrs. John Hunter, and one niece, Gladys Hunter.

The funeral service was held at St. Cyprian's Church and interment took place at the Didsbury cemetery.

**Wanderer Sent To Jail.**

Jack Macdonald, of no fixed abode, was arraigned before Magistrate Geo. Peattie at Olds last Wednesday on a charge of being drunk and disorderly, and begging at Didsbury on Tuesday March 28th. Macdonald was also accused of uttering insulting language to those refusing him the price of a meal. The magistrate found him guilty and sentenced him to five months with hard labor in Lethbridge.

**WEEKLY SERMONETTE**

"The important thing about a problem is not its solution, but the strength we gain in finding the solution."

for

In the better restaurants, where quality is insisted upon, Christie's Premium Soda Crackers are always chosen.

Always crisp . . . always fresh . . . always pure . . . with a trace of salt that makes them "just right" to enjoy with soups, salads, cheese and "made" dishes.

## Christie's PREMIUM SODA CRACKERS

CHAPTER VII. Continued

In his cabin, with the steamer thrumming on toward Stead-Ed, Alan wondered what Joyce's reaction would be if he should go to her and frankly tell her about that tragic incident in his life which had brought about his engagement to Elizabeth. Joyce would understand his motive. She would no longer think he'd acted of his own free will. Perhaps if she knew this truth she might allow him to resume their old intimacy. But Elizabeth, what of her? She was waiting, waiting there in Elmhurst, for him to marry her. In honor and truth he could not break away now. That secret and powerful circum-

stance still bound him and would bind him to her all his life.

A half-mile up in the fleecy clouds up above the pretty city of Edmonton, Mr. "Buzzerd" Featherfoot was dropping out toy parachutes carrying free cakes and pointed matter of the E-Z Klean Soap and Washing Powder Company, Ltd.

He was tired, stiff, hungry and indifferently bored.

During the late war Buzzerd had landed an assorted number of Fokkers, Teachers and Albatrosses out of the air; had come down himself a couple of times rather precipitately; and once, commanding a five-plane circus, hand brought down a Super-Zeppelin in the Channel after it had dropped its "eggs" in cabbage patches around derelict London.

Since his return to Canada, Buzzerd had taken a fling at aerial map-making in British Columbia; had worked a season with the Manitoba Fire Prevention as a "smoke hawk"; had bombed papier-mache French chateaux down amid the flowers and climate of Los Angeles.

Recently, tired of working for other folk, he had raked together some money and bought a machine of his own, which he now was flying.

It was a queer nameless contraption, this monoplane of his—an assemblage of piano wire, canvas, springs and iron, held together by luck and Buzzerd's lizardry at flying. It

had originally been a White Speedster with "Jenny" engine, but he had redoped the fabric and put in a second-hand Whirlwind and equipped it with two-tones motor-gear of the float-wheel type, and overhauled it generally till little of the original machine remained. Only his warm friendship with the aviation inspector kept it from being junked. But somehow, and this the much-lamented test of any flying machine, it had never yet come down before Buzzerd wanted it to. And it did have speed; anything lacking speed would never have satisfied him. Such as it was, it was his very own; and no pilot was ever prouder of a cross-eyed snaggle-toothed child than Buzzerd was of his White Speedster.

He was, however, ambitious to get a big new De Havilland, so that he could safely take up a girl down in Kamloops and carry her along with him on his airy path of life. But with no advertising or his company to back him, Buzzerd had found this free-lance work to be tough sledding. Had found difficulty keeping up repairs on his old machine, let alone getting a new one. Jobs were sheer accidents. Except for the faint possibility of murdering some more troupe hoppers over near High Hat, the work he was finishing this noon was the last thing in sight.

As he heaved overboard the last of the E-Z Klean Soap and painted matter, and headed back for the landing field, he yawned and swore.

The devil with this peace-time stuff. Oh, Lord, I wish they'd bring on another unpleasantness.

It was in some such frame of mind, as he landed and crawled out of the cockpit, that he saw a tall lanky individual, in lace boots, khaki trousers, jacket and gray hat, get out of a waiting taxi and saunter toward him.

The stranger, as he came up, looked at the machine with that peculiar rapturous gaze of a person who has never flown in one.

Buzzerd thought, "If that fellow sets me to take him for a joy ride, I'll murder him with a monowrench!" A moment later, as he got a closer look at that hard purposive face, he decided: "No, he's not that kind. Looks like some timber duffer. Maybe wants me to fly him out to his land. Thirty-dollar joy dim-sum!"

The stranger came on, "Hi-ya!"

Buzzerd answered tartly, "Hello yourself!"

The stranger paid no attention to the brusque reply. Instead he reached out his hand. It was a good-looking hand, big, calloused, fingers like iron bars.

"Name's Baker," he introduced himself, "Alan Baker."

Buzzerd partly thawed. This fellow Baker looked to be somebody. His slow smile was mighty fetching; his clear intelligent eyes were kindly, warm, friendly.

"And to know you, Baker, Miss Featherfoot, James Arbutnot Featherfoot."

"Good gracious! All that? But what do people call you?"

They both grinned. "They call me 'Buzzerd.' Wear red helmet; never drop my wings."

"Buzzerd," that's more like it, I saw you sailing around up there when I got off the train. Made inquiries and hustled out here to the field. Was on my way down to Winnipeg. Expected I'd have to go down there, or maybe to Calgary, to find a machine and a pilot."

"Uh-huh."

Baker jerked his thumb at the plane. "Where is that?"

"Looking at you. Belongs to me and myself. Unlimited. Bought it with cigarette money."

Baker's face brightened a little, and now Buzzerd noticed that this hard-bitten man was deeply worried but was hiding his trouble and talking with a jest on his lips.

"So the machine belongs to you, that is to hear that. Working on your own hook, I suppose." That's still better. Say, Featherfoot, how long are you booked up ahead?"

Buzzerd had found it good policy to lie. If he made out there was a crushing demand for his services, it impressed people and got him jobs sometimes.

"Oh, about two months," he said carelessly. "All depends on how much flying weather I get."

Baker plucked a blade of grass and chewed it meditatively. Finally he asked: "Say, Featherfoot, you couldn't

shake free for a couple or three weeks, could you? Get sick, or have to get married, or something like that?"

Buzzerd took thought as he batted an eye. A couple or three weeks. . . . Must be a good-sized job. . . . might pay well. . . . On d—n the pay! Always thinking of pay. Getting commercial. . . .

"I might," he answered. "Depends. What kind of flying do you want me to do? What for a job is it?"

"That would take me some time to explain. I wouldn't want any man to tackle it without him understanding the whole thing, or then he might feel I'd dragged him into trouble."

Something in Baker's tone made Buzzerd look at him sharply. "Nothing illeg—crook—out of the ordinary, is it?"

"It's all three, and then some."

Buzzerd bit his cigarette. "And then some? My eyes! Where you deciding that on?"

"If you want to know who I am, I was in the Mounted. The O.C. here at Edmonton can tell you about me. And I can give you other references."

"You were in the Mounted?" Buzzerd frowned thoughtfully. "Baker, the Mounted? No, they haven't I heard of read somewhere."

Alan said: "My story is a long one. You look as hungry as I feel. . . ."

"I am, Baker. Let's go eat and then talk."

Alan helped him pull a canvas over the machine. Together they stepped over to the taxi. As they rambled down town they swapped war yarns, discovered several mutual acquaintances and came down to "Alan" and "Buzzerd."

At the Chateau MacDonald Alan sent a telegram to Colonel Steele in Victoria. He wrote it swiftly, not daring to think twice of the fatal step.

"Am out of Mounted accepting your fine offer will you wire me five hundred as advance would be mighty grateful letter following with details."

"ALAN BAKER."

He and Buzzerd ate dinner; and then for a solid hour Alan talked.

He told of the Midnight Sun robbery of the chase, fight, escape of Dave MacMillan's trouble; of his resolve to help Joyce; of Joyce going bravely back to the lonely trading station; of his run-in with Haskell, his getting busted, his buying out of service, his thousand-mile trip to Edmonton.

"But just where do the old crate and me come in at?" Buzzerd asked.

To Be Continued.

Tested Its Invention

To prove that his unbreakable glass would not break, an inventor in Berlin, Germany, recently placed it in the eye-socket of a gas mask he wore, and pounded the glass with a hammer.

FREE TRIAL OFFER OF KRUSCHEN

If you have never tried Kruschen, try it now at our expense. We have distributed a great many special "GIANT" packages which make it easy for you to prove our claims for yourself. Ask your druggist for the new "GIANT" 75c package.

This consists of one regular 25c bottle together with a special 50c bottle—worth about one week. Then the trial bottle free, put it to the test, and then, if it meets with your approval, we'll send you a regular bottle in full as good as new. Ask it for you. Immediately and without question, we'll send you a regular bottle in full as good as new. What would be better? Kruschen's Big Bottle, 175c. Bacteriologist, Macmillan's Big Bottle, 175c. ### Miss Campbell's Recipe for Cup Cakes

1/2 cup butter 2 cups pastry flour  
1 cup sugar 1/2 cup  
2 eggs 1 level shot  
1/2 teaspoon vanilla 2 teaspoons Magic  
1/2 cup milk  
1/2 teaspoon salt 1 cup milk

Cream butter thoroughly; add sugar a little at a time, beating well. Add yolk of egg and vanilla, beat well. Sift flour with baking powder and salt, and add, alternately with milk, to first mixture. Fold in stiffly beaten egg whites. Bake in grease cups, cake tins, or in paper baking cups, in moderate oven at 375° F. about 25 minutes. Serve warm from oven, sprinkled with powdered sugar. Or cool, and frost the tops. You will find many delicious frosting recipes in the Magic Cook Book.

## "Cup Cakes are delicious when made with Magic Baking Powder,"

says Miss Helen Campbell,  
Director of  
The Chatale Institute

"Cup baking goes hand in hand with good materials," Miss Campbell will tell you.

That's why Magic Baking Powder is used and recommended by The Chatale Institute. Magic meets all the Institute's rigid requirements of fine quality—repeated tests have proved it absolutely pure, uniform and dependable.

The majority of dietitians and teachers of cookery throughout Canada plan their recipes for Magic. They use it exclusively because they know it gives consistently better results.

And 3 out of 4 Canadian housewives say Magic is their favorite. It outsells all other baking powders combined.

Remember—substitutes are never as good. Do as the experts do. Use Magic Baking Powder.

Free Cook Book—When you bake at home, the new Magic Cook Book will give you dozens of recipes for delicious baked foods. Write to Standard Brands Limited, Essex Avenue and Liberty Street, Toronto, Ontario.

Policeman: "What are you thinking here for?"

Leader: "Nothing!"

Policeman: "Well, just move on. If everyone stood in one place, how would the rest get past?"

## FOR ANY PAIN

Have you ever found any quicker relief than this?

Anyone can take Aspirin, for doctors have declared these tablets perfectly safe.

And there is no quicker form of relief for any pain.

It is well to remember these things when anyone tries to persuade you to try anything in place of these tablets.

Aspirin may be taken as often as there is any need of its comfort: to stop a headache, throw off a cold, drive away the pains from neuralgia, neuro-

tic, rheumatism, lumbago, etc.

Whenever you take Aspirin you know you are going to get immediate results—and you know there will be no ill effects.

You know what you are taking.

Why take chances on some form of relief which may not be as safe? The new reduced price on bottles of 100 tablets has removed the last reason for ever experimenting with any substitute for Aspirin.

Aspirin is a trade-mark registered in Canada

## NOTICE

A DIVIDEND for the year 1932 will be issued  
to all contract signers of Mountain View's open-  
ative Livestock Marketing Association.

All non-contract signers may participate in the  
profits, if the contract is signed before May 1st.  
The contract is continuous and no renewal is  
necessary.

This contract may be terminated at the end of  
any year on and or written notice to the Manager,  
Dr. Stanger.

[Signed] Robert Stuart, Secretary

## Mountain View Notes

The Five-Hundred Club was enter-  
tained at the home of Mrs. Thomas  
Finley on Saturday evening. The  
prizes were won by Mrs. Garnet  
Tighe and Mr. H. Roberts.

A large crowd assembled at the  
Community Hall on Friday evening  
to witness the concert given by the  
pupils of Mona, Neopolls, Juland,  
Grand Centre and Rosebud schools,  
in order to raise funds for the school  
fair. The program was greatly  
enjoyed by all, and great credit is  
due to those teachers who prepared  
same. At the end a solo was ren-  
dered by Mr. H. Reynolds, of Calgary.  
Lunch was then served and the light  
fantastic was tripped for an hour or  
so. The sum of \$25.00 was realized.

### The Farmer's Wife.

The farmer has a busy life,  
But not half so busy as that of his  
wife;  
For washday comes on Monday morn,  
Which makes her wish she'd ne'er  
been born.

Another day is filled to the brim,  
Attacking the ironing with vigor and  
vim;  
Attending the chicks and baby yet  
small,  
She says, "O, why did I marry at all?"  
Her music and her literary wishes  
Are sadly neglected for cleaning and  
dishes,  
So teachers, stenographers, nurses,  
and all  
Beware lest you too get a good hard  
fall.

## Melvin Notes

Mrs. Chas. Young is spending  
the week with Mrs. J. Adams.

Ethel and Harold spent Sunday  
with Mr. and Mrs. Elmer Cowitz.

Mr. and Mrs. Ed. Vetter, of Three  
Hills spent Sunday with Mr. and  
Mrs. Peter Johnston.

Mr. and Mrs. Lloyd Chandler and  
family spent Sunday with Mr. and  
Mrs. Lawrence Chandler.

A number of friends spent an  
enjoyable evening at the Carlson  
home Wednesday last in honor of  
Mr. Carlson's birthday. Whist was  
played and Mrs. W. Brown and  
August Krebs took the honors. A  
dainty lunch was served by the  
hostess and all went their way wish-  
ing Mr. Carlson many more birth-  
days.

## Burnside Notes.

Mr. Albert Spraggs spent Sunday  
with Mr. and Mrs. Ed. Anderson.

Mr. Fred Metz took in the fat-stock  
show in Calgary last week.

Mr. H. McLean has been laid up  
with an attack of tonsillitis.

Mrs. Page and son spent Sunday  
with Mr. and Mrs. Otto Bittner.

Don't forget the U.F.A. hand-  
kerchief social in Lone Pine Hall  
tomorrow evening (Friday).

Mr. Bobbie Ryan arrived Sunday  
from Sweetwater, B.C. to help Mr.  
Casper Sanforth in his spring work.

Lone Pine W.L. meets Thursday  
next, April 13th at the Lone Pine  
Hall. Mrs. Hosgood, constituency  
convenor is expected to be present.

Mr. and Mrs. Duncan Morrison  
and sons Sydney and Melvin, of Co-  
burn, and Mr. Sam McAllister,  
spent Sunday with Mr. and Mrs. N.  
Eckel.

The house and granary on the  
farm owned by Mr. Miller McCulloch,  
formerly the Clarence Stuart place,  
were burnt in a fire which broke out  
in the high wind Monday.

The largest shipment of Gov-  
ernment-improved cockerels for  
any one breeder or hatcheryman  
in Canada arrived recently by  
Canadian Pacific special at Per-  
gas, Ont., from Winnipeg to the  
order of J. G. Tweedie, of the  
former city. The birds were se-  
lected by government inspectors  
from the choicest flocks from  
British Columbia to Nova Scotia.  
During the last four years Mr.  
Tweedie has shipped an average  
of 20,000 chickens to various  
points between the Atlantic and  
Pacific.

## LOCAL & GENERAL

Mr. Jack Currie was a Calgary  
visitor Monday.

Mr. P. Soderberg, who has been  
farming for several years east of  
town, has moved to 60-mi. N.W.  
of Lacombe, where he has purchased  
a farm.

The W.C.T.U. April meeting will  
be held at the home of Mrs. Bur-  
holder on Thursday next at 3 p.m.  
Mrs. Bostiger and Mrs. Oldham  
will have the topics for the day.  
All members and friends cordially  
invited.

The morning service at Zion Evan-  
gelical Church will be a special Palm  
Sunday service, the sermon subject  
being "Christians as Palm Trees".  
In the evening the pastor will con-  
tinue his series of sermons from the  
Old Testament, and the subject will  
be, "Joseph Raised to Power."

The need of police cells was empha-  
sized Monday evening when two  
transients who had been inbibing  
rubbing alcohol started a distur-  
bance Monday night on Main Street.  
Constable Kercher found it necessary  
to deputize several citizens to hold  
the prisoners until he could get  
Constable Dubbin, R.C.M.P. Olds,  
to take charge of the men. They  
were tried at Olds Tuesday morning  
and received a term in Lethbridge  
gaol.

Of the 4,945,512 pounds of can-  
ned pineapple consumed in Can-  
ada between April 1 and Novem-  
ber 30, 1938, all but 358,582 lbs.  
came from countries within the  
Empire, nearly half the total be-  
longing from the Straits Settlements.

Literacy in Canada is near the  
vanishing point. According to the  
last census in 1931, 92.34 per cent,  
of the population of Canada over  
five years of age could either read  
or write. Students enrolled in  
Canadian schools in 1931 number-  
ed 2,542,747.

The Canadian Pacific Railway  
Company's tax bill for the year  
was almost six million dollars,  
bringing its total contribution to  
Canada's tax collections since in-  
corporation to about \$16,000,000.  
—E. W. Beatty, K.C., Chairman  
and President, Canadian Pacific  
Railway, in his review of 1932.

Instant Lighting  
Coleman Iron

SAVE WORK!

YOU needn't be tied to a  
hot stove on freezing days. Use  
the new Model No. 4 Coleman  
Instant Lighting Iron, anywhere,  
anytime, in any weather. No cords or  
tubes to bother with. Makes its  
own gas. Lights instantly. No oil  
strike a match and turn a valve.

Ease is double pointed...  
furnishes service on both for-  
ward and backward strokes.  
New "Button Bevel" makes it  
easy to turn around, buttons,  
under pilots and along seams.

Blue porcelain enamel finished  
body. Handle enameled to match.
